Feature engineering is important to do better! Create a new notebook using a Kaggle notebook Create new model using a Kaggle notebook Create new data sources using a Kaggle notebook Collaborate with others on a Kaggle notebook Run client side code such as Shiny UI, web apps, or web services You can run client side code to create interactive online applications with Shiny or Rserve or web applications such as Notebooks, LaTeX with inline live plots and live updating Table of Contents. Self guided Notebooks Code examples for topics covered in chapter are provided. They are available at the end of each chapter for you to access the notebook. You will learn the following: Teaching with Jupyter Notebooks Analyze Data with Python and Pandas Implement Machine Learning Use iPython to Create Interactive Data Analysis with Python Use Pandas to Manipulate Data with Python Use the Modeling Toolbox Use Base R and Python for Data Analysis Implement Random Forests Use Amazon's Machine Learning Services Create Hive on Amazon RDS Create Amazon Redshift Data Store Create a Data Analysis Pipeline Use Amazon S3 to Store Large Scale Data Save Data to Amazon S3 Use Amazon Elasticsearch Service Build a Big Data Cluster in the Cloud Integrate Amazon S3 and Amazon EMR Use Amazon EC2 to Provide On-Demand Compute Capacity Use Amazon Athena to Query in the Cloud Use Amazon Redshift Spectrum Analyzer Publish a Catalog to Amazon Simple Storage Service (S3) Share Your Data with Amazon Simple Storage Service (S3) Build a Data Pipeline with AWS Lambda Build a Data Analytics Application with Python and Lambda Build an HTML5 Application with HTML, CSS, and Javascript Deploy to Cloud-Based Applications Use Amazon Mobile Hub to Build Mobile Applications Chapter 1: Getting Started with Jupyter Notebooks Chapter 2: Using Python for Data Analysis Chapter 3: Data Wrangling in R Chapter 4: Using Pandas for Data Analysis Chapter 5: Applying Machine Learning Chapter 6: Implementing Random Forests Chapter 7: Importing and Analyzing Public Data Chapter 8: Working with Amazon S3 and Amazon EC2 Chapter 9: Deploying Your Application
